System Equipment

Integrated Payment Processing

Simplify business operations with URS' integrated payment solutions that enable every type of transaction directly from your electronic cash register (ECR) or POS System.

First Data created a reliable, fast and inexpensive platform for Internet Protocol (IP) processing.

The benefits you can receive are tremendous:

- 2 to 3 Second transactions
- Credit Card, Debit Card, EBT and Check Card Processing
- IP Processing Relies on Secure yet Inexpensive DSL Connection (**A MUST**)
- Real-Time Reporting Website

Most SAM4s ECRs are compatible for Integrated Payment Processing by having built-in card readers or by having an option for IPTRAN integration via serial connection.

With this options customers need to forget the time wasted in swiping and entering the amounts on costly and slow external terminals. This guarantee a fast and reliable transaction.

Polling Software / Manual

SAM4s SPS-300 Polling Software For Windows XP/Vista/7

Polling software for SPS-300 Cash Register is the easiest way to change prices and add/delete items when having more than one cash register in the store.

It not only let you change PLUs but also let you poll the information from the register to keep track of the transaction and Z-out reports.
